

jLaBase Community Repositories

Table of contents

1 DTD Repository.....	2
2 Maven Repository.....	2

1. DTD Repository

jLaBase works with lots of xml resources, we provide to any user the availability of our DTD's at:

<http://jlabase.sourceforge.net/dtd/>

In this repository you will find many DTD's, ones dedicated to the development process, and some others used by the environment at runtime. Don't modify the *DOCTYPE* references of the xml files, take a look to the documentation for learning more about jLaBase DTD's and xml files. If you are searching more information about the jLaBase DTD's do a visit to our Wiki site.

2. Maven Repository

The jLaBase Team is setting up a [Maven](http://maven.apache.org/) (<http://maven.apache.org/>) repository at <http://jlabase.sourceforge.net/repository>. [Maven](http://maven.apache.org/) (<http://maven.apache.org/>) users can add that URL to their's `maven.repo.remote` property.
